B. Fees

Fee should be calculated using the following process & worksheet. ***Please see Instructions before filling out worksheet.***

Step 1/Type of Activity: Describe each type of activity that will occur in wetland resource area and buffer zone.

Step 2/Number of Activities: Identify the number of each type of activity.

Step 3/Individual Activity Fee: Identify each activity fee from the six project categories listed in the instructions.

Step 4/Subtotal Activity Fee: Multiply the number of activities (identified in Step 2) times the fee per category (identified in Step 3) to reach a subtotal fee amount. Note: If any of these activities are in a Riverfront Area in addition to another Resource Area or the Buffer Zone, the fee per activity should be multiplied by 1.5 and then added to the subtotal amount.

Step 5/Total Project Fee: Determine the total project fee by adding the subtotal amounts from Step 4.

Step 6/Fee Payments: To calculate the state share of the fee, divide the total fee in half and subtract \$12.50. To calculate the city/town share of the fee, divide the total fee in half and add \$12.50.

To calculate filing fees, refer to the category fee list and examples in the instructions for filling out WPA Form 3 (Notice of Intent).

Re: Notice of Intent - Project Narrative

Applicant/Owner: Ray Charles Realty Trust

Project Type: Proposed Residential Boat Lift System

Site Address: 162 Main Street

Lot #8 on Assessors Map #12

Project Purpose:

The purpose of the project is to construct/install a private Boat Lift System at the end of the existing residential pier facility.

Site Background:

The site is approximately 17,447 sq. ft. in size and is bordered westerly by the Acushnet River, easterly by Main Street and northerly and southerly by developed residential properties. The entire site is developed with a single family dwelling, paved driveway and manicured lawn areas throughout.

Wetland Resource Areas:

The westerly portion of the site falls with Land Subject to Coastal Storm Flowage, Flood Zone AE (El. 6). The site contains coastal resource areas; Salt Marsh, Coastal Bank (top of the vertical stone/concrete seawall), Coastal Beach, Land Under Ocean and Land Containing Shellfish. The waterway where the pier is proposed is not mapped by the Natural Heritage and Endangered Species Program and does not contain any eel grass per Mass-GIS Oliver. The NOI Application was sent to the MDMF, Fairhaven Harbormaster/Shellfish Officer for review and comments.

Project Description:

The Applicant proposes to construct/install a mechanical boat lift system to be located at the seaward end of the existing float. The system will require the installation of four (4) 12" diameter timber piles using a crane resting on a barge. Said piles will be installed using a vibratory hammer to a 25-foot penetration. Upon completion of the pile installation, steel I-beams will be fastened to the top of the piles. An electric motor will be fastened to the top of the beams. Stainless cables will be secured to the I-beams which will be used to raise and lower a cradle-type system as depicted on the plan. All work will be performed using the barge. No land activity is required. The barge will be operating in water depths greater than 3 feet at a low tide event (> 6.6 ft. at high tide). The total impacts = <4 sq. ft. of Land Under Ocean. It should also be noted that a trench will be excavated from the landward end of the pier to the house through the lawn for the installation of an electric conduit.
