Project Name: Masonry repair of Academy building foundation

Project Location/Address: 141 Main st.

Amount Requested: \$45,000

Project Summary: In the space below, or attached sheets if necessary, provide a detailed summary of the project citing the elements of the Guidelines for Submission and Review and Recommendation Criteria found in the Application Guidelines.

Facility Dept. is seeking funding in the amount of **\$45,000** to undertake urgent masonry repairs on the historic **Academy Building**. The primary goal of this project is to **prevent further water infiltration** through the aging exterior foundation, which is threatening the preservation of the building.

This historic structure holds significant cultural and architectural value to our community. However, time and weather have compromised the masonry, allowing moisture to seep in, which accelerates deterioration and risks long-term damage to both the interior and exterior.

The scope of the work includes:

- Careful removal and repointing of damaged mortar using historically appropriate materials all original stones will be reused
- Replacement or resetting of original pieces of any unstable masonry units
- Ensuring the repairs blend seamlessly with the building's original historic character

By completing these repairs, we aim to **protect the Academy Building from further water damage**, preserve its historic fabric, and maintain its usability for future generations.

We respectfully request your support in the amount of **\$45,000** to fund this essential preservation project.

We appreciate the Committee's consideration for this necessary project
