Fairhaven Wind is expected to be presenting a proposal on the contract. Chair Frezza reviewed questions that had been submitted to Weston & Sampson regarding the wind turbines. The following responses were received:
 - a. Does the tree clearing from a possible subdivision change the study previously performed? Weston & Sampson advised that while the removal of a large number of trees associated with a potential subdivision could have a measurable impact, it is not likely to be significant enough to alter the conclusions of the original study.
 - b. Due to the age of the turbines would replacing the generators make them quieter? Weston & Sampson noted that the power level of any turbine within this class would be approximately the same.
 - c. Would both turbines need to be running in order to do any studies? Weston & Sampson indicated that both turbines would need to be running.

Further discussion ensued in regards to obtaining new testing. Agent Flaherty to reach out to Weston & Sampson regarding performing new studies.

Discussion ensued regarding questions and considerations for the Select Board meeting. Chair Frezza would request that the Select Board consider the impact of the turbines on the residents. There needs to be oversight of the contract and a means to contact

Fairhaven Wind. Member Acksen noted that the distance of the turbines to a residence needs to be considered.

Bob Espindola of John Street – noted he plans to attend the Select Board meeting and thanked the Board of Health for having this discussion.

Further discussion ensued from the Board regarding the contract, mitigation plan and topics of discussion for the Select Board meeting. Vice Chair Meneses noted that requesting new testing needs to occur.
