NOTICE OF FILING AND REQUEST FOR COMMENTS

D.P.U. 26-59

May 15, 2026

Petition of NSTAR Electric Company d/b/a Eversource Energy for Approval of its 2026 Energy Efficiency Reconciling Factors for effect July 1, 2026.

On May 1, 2026, NSTAR Electric Company d/b/a Eversource Energy ("Company") filed with the Department of Public Utilities ("Department") a petition seeking approval of its 2026 Energy Efficiency Reconciling Factors ("EERFs") for effect July 1, 2026. The Department docketed the Company's petition as D.P.U. 26-59.

An EERF collects additional funds for approved energy efficiency programs when the cost of implementing those programs exceeds other funding sources. See G.L. c. 25, § 19(a). The Company proposes the following EERFs for effect July 1, 2026: (1) 2.042 cents per kilowatt-hour ("kWh") for residential customers, including low-income customers; and (2) 1.139 cents per kWh for commercial and industrial ("C&I") customers. The proposed EERFs are designed to: (1) collect costs associated with the Company's 2026 energy efficiency program implementation in excess of other funding sources; and (2) reconcile expenses and revenues from the previous year's program implementation.

In addition, on April 3, 2026, the Company filed a request to change the effective date of its EERFs from July 1 to September 1 each year, beginning with the instant EERFs. The Department indicated that it would consider the Company's request for a revised effective date as part of its investigation of the instant EERFs in this proceeding. Hearing Officer Memorandum at 1 (April 17, 2026). Pending the Department's determination on the Company's request to modify the effective date, the instant EERF filing proceeds on the basis that the proposed rates will take effect on July 1, 2026.

If the Department approves the 2026 EERFs as proposed, the Company states that customers will experience the following bill impacts:

- a typical residential customer (R-1) in Eastern Massachusetts using 530 kWh of electricity per month will experience a monthly bill decrease of \$1.13 (or approximately 0.6 percent);
- a typical residential customer (R-1) in Western Massachusetts using 545 kWh of electricity per month will experience a monthly bill decrease of \$1.17 (or approximately 0.6 percent);

- a typical low-income residential customer (R-2) in Eastern Massachusetts using 475 kWh of electricity per month will experience a monthly bill decrease of \$0.59 (or approximately 0.6 percent);
- a typical low-income residential customer (R-2) in Western Massachusetts using 585 kWh of electricity per month will experience a monthly bill decrease of \$0.72 (or approximately 0.6 percent);
- a typical residential customer on a heat pump rate (R-1HP) in Eastern Massachusetts will experience a monthly bill decrease of \$3.67 (or approximately 0.8 percent) in winter and a decrease of \$1.29 (or approximately 0.6 percent) in summer;
- a typical residential customer on a heat pump rate (R-1HP) in Western Massachusetts will experience a monthly bill decrease of \$3.77 (or approximately 0.9 percent) in winter and a decrease of \$1.33 (or approximately 0.6 percent) in summer;
- a typical low-income residential customer on a heat pump rate (R-2HP) in Eastern Massachusetts will experience a monthly bill decrease of \$2.12 (or approximately 0.8 percent) in winter and a decrease of \$0.75 (or approximately 0.6 percent) in summer;
- a typical low-income residential customer on a heat pump rate (R-2HP) in Western Massachusetts will experience a monthly bill decrease of \$2.19 (or approximately 0.9 percent) in winter and a decrease of \$0.77 (or approximately 0.6 percent) in summer; and
- C&I customers will experience a range of bill impacts, from no change to an increase of 1.5 percent, depending on rate class and usage. For specific bill impacts, these customers should contact the Company as shown below.
