Dear Ms. Hart,

I am writing regarding the public correspondence link on the website.

Currently, the link is not visible on the homepage or under the "News and Notices" section. Without the specific instructions provided in your recent email, it would be difficult for the public to locate this resource. Additionally, the current label reads simply as "Correspondence" rather than "Public Correspondences," which does not provide full context to the public.

I recommend updating the site navigation and revising the label to "Public Correspondence" to improve accessibility and clarity for visitors.

Sincerely,

Michelle Costen
